

In November 2006, PolyCello, an industry leader in the field of flexographic printing, has acquired the former Nordenia plant in the City of Belleville's northeast industrial park. The 77,000 square foot plant is ideally suited to manufacture a number of packaging products. PolyCello selected the Belleville facility because of its strategic location in North America, skilled labour force, business-friendly climate and proximity to many of PolyCello's customers and suppliers. PolyCello has been operating for more than 50 years and employs 300 people in its Nova Scotia facility. The company hopes to reach 80 employees as contracts are secured.
